SUMMARY

Self-driven Software Engineer with 3+ years of experience building scalable, full-stack and open-source software. Strong generalist with hands-on experience across product development, systems, DevOps, operations, and L2 support. Experienced in building and running production systems using Python, JavaScript, TypeScript, and Go. Linux enthusiast with a strong interest in software architecture, distributed systems, cloud technologies, and AI. Enjoys tackling complex problems and taking ownership from development through production.

EDUCATION

University of Surrey - Masters in Artificial Intelligence

Feb 2025 - Apr 2026

EXPERIENCE

Software Engineer (Freelance) | Korecent Solutions, Solarblocks Energy

Oct 2024 – Jan 2025

- Implemented features using Python, Javascript, VueJS for migrating Chewy (Fortune 500)'s ERP workflows from Oracle to ERPNext, accelerating the transition timeline by several weeks.
- Built vendor onboarding and cost-change management workflows for a B2B business using Python, JavaScript, and VueJs, enabling the team to migrate critical processes to ERPNext.
- Led development of internal CRM integrations with messaging platforms including WhatsApp and Twilio reducing manual customer communication and automating lead management.

Software Engineer | Frappe Technologies

Aug 2021 – Jul 2024

- Maintained and scaled an open-source cloud product serving 50K+ users and generating \$2M ARR, built with Python, JavaScript, VueJs, AWS, Redis, and MariaDB.
- Scaled an online application Marketplace from 60 to 185 published applications by shipping features like paid apps, onboarding workflows, review system, and SLA management.
- Reduced infrastructure costs by \$1,500/month (\$18k annually) by implementing region-wise backup localisation on AWS, eliminating ingress and egress charges.
- Owned revenue and payment infrastructure built on Stripe and Razorpay, diagnosing and resolving critical billing issues to improve transaction reliability and drive 13% month-over-month revenue growth.
- Built and iteratively improved a SaaS platform from the ground up using Python and Vue.js, developing onboarding, subscription and payment workflows that increased signup conversion by 25%+ and reduced onboarding time by 50%.
- Built a standalone Zero-Config Email Delivery Service using Python and Mailgun, enabling seamless transactional email without manual server configuration.
- Developed an S3-compatible storage integration using MinIO, Docker, and deployed in a distributed server environment, enabling self-hosted deployments to use scalable object storage without relying on managed cloud infrastructure.
- Provided L2 production support and on-call coverage for cloud infrastructure, diagnosing production incidents and improving monitoring and alerting across AWS services.
- Contributed to 5+ open source projects and gave a talk at Frappeverse Conference on Application Marketplace and using GitHub Codespaces in cloud environments for rapid application development.

SKILLS

Frappe Framework/Django/FastAPI/Flask/NodeJS, Python/Javascript/Typescript/Go, ReactJS/Vuejs, Docker, Ansible, Linux, Bash, AWS, Git, Github CI/CD, MySQL/MariaDB/PostgreSQL, Nginx/Caddy, Graphana/Sentry/Elastic Search/PostHog, Cursor/Claude.
