PROFESSIONAL SUMMARY

Self-driven Software Engineer with 3+ years of experience in building scalable full-stack open source applications. Proven track record of reducing costs, improving revenue, and delivering high-impact features. Expertise in Python, JavaScript, Golang, and cloud technologies. A generalist at heart with a strong Linux background, worked on product development, DevOps, operations, L2 support and product led growth while owning systems end to end. Comfortable owning complex systems and driving them from idea to production.

WORK EXPERIENCE

Korecent Solutions

Senior Consulting Software Engineer | October 2024 – January 2025

- Collaborated with Fortune 500 company [Chewy](#) on multiple projects to migrate internal ERP system from Oracle ERP to ERPNext
- Established internal engineering structure and coding standards to improve code quality and consistency. Conducted technical interviews and participated in hiring process to build high-performing engineering teams

Frappe Technologies

Software Engineer | August 2021 – July 2024

- Delivered 1000+ commits and 100+ pull requests as 2nd highest contributor on [flagship product](#)
